

Hardware Developer

Appear TV is expanding its product development teams. We are looking for an enthusiastic and skilled **hardware designer**. The right person will be developing products, handling live TV distribution. Hardware development works closely with the software- and FPGA development teams, creating next generation products for audio and video applications.

Degree: MSc., Cand. Scient (or equivalent)

Your responsibilities will be within all/some of these areas:

- Development of Audio and Video technology and products
- Digital electronic design with embedded CPU systems
- Analog/RF design
- Schematics
- Follow-up of PCB layout sub-contractors
- Startup of new HW/verification and adjustments
- Interface manufacturer
- Contact with the component industry
- Manage certification processes (EMC, Safety etc)

You have a positive attitude and want to work with an experienced team, developing tomorrow's technology and products. You will be working with challenging development tasks, and stringent delivery dates. Appear TV's philosophy is to develop products in close co-operation with customers. By providing carrier grade products and solutions within project timelines we help service providers gain a competitive edge

We offer:

- An exciting place to work with a lot of humor and energy
- State-of-the-art products and technology
- Inspiring customers and projects
- International environment with worldwide customer base
- Professional career development
- Competitive terms

We would prefer a few years of professional experience.

Send your resume and application as soon as possible to jobs@appeartv.com
