

Software Developer (IPTV) – Systems developer

You will be a part of our software team and responsible for developing and designing solutions for transporting Video over IP centric networks. The position will give you the possibility to develop your skill set by delving into different programming areas and technologies, operating systems and hardware platforms. All the software developed in-house runs on high performance hardware that is also developed onsite.

Degree: MSc., Cand. Scient (or equivalent)

You possess skills/interests in the following areas:

- The entire development cycle - Specification/Design/Implementation/Test
- C++ programming
- Real-time programming on Linux Operating System
- Networking protocols
- Embedded platforms CPUs & DSPs
- Software architecture and design methods

You have a positive attitude and want to work with an experienced team developing tomorrow's technologies and products. You will be working with challenging development tasks and delivery deadlines.

We offer:

- An exciting place to work with humour and energy
- State-of-the-art products and technology
- Inspiring customers and projects
- International environment with worldwide customer base
- Professional career development
- Competitive terms

Professional experience would be advantageous but not essential. Send your resume and application clearly marked to jobs@appeartv.com or for further information contact John Øivind Saxebøl on +47 2411 9020.
